Click on Install to confirm and start installation.

Your app is getting installed.

**CONGRATULATIONS!**

**Your app is successfully installed. Now you can use the app.**

Click on "done" to work later on the app.

Click on "Open" to open app.

## ENABLE GPS SETTINGS

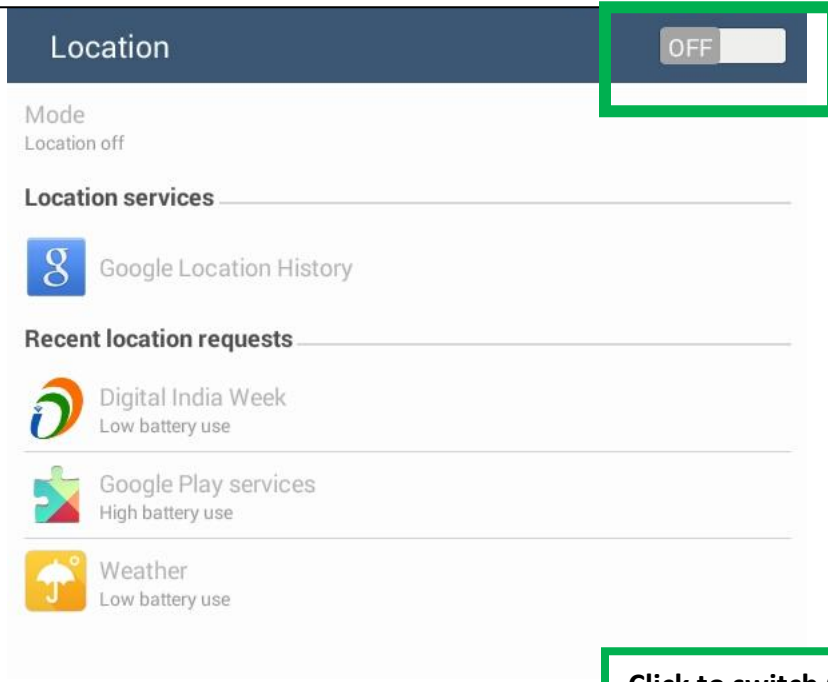

Make sure that you have switched ON your GPS settings in order to use the app properly.

The screenshot shows a mobile application interface for 'Location and Centre Incharge Details'. At the top, there are logos for 'Digital India Power To Empower' and 'NeGD National e-Governance Division'. Below the title bar, a note states: '\*Note - These details are to be submitted when physically present at event location.' The form contains several fields: 'Latitude \*', 'Longitude \*', 'Stakeholder \*', 'Department', 'State \*', 'District \*', and 'Location Type \*'. Each field has a corresponding input area or dropdown menu. A modal dialog box titled 'gps setting' is overlaid on the form, displaying the message 'gps not enable' and two buttons: 'settings' and 'cancel'. A green rectangular box highlights the 'settings' button, and a red rectangular box highlights the 'cancel' button. A green arrow points from the 'settings' button to a text box below, and a red arrow points from the 'cancel' button to another text box below.

Click on the settings button to switch on the GPS Settings

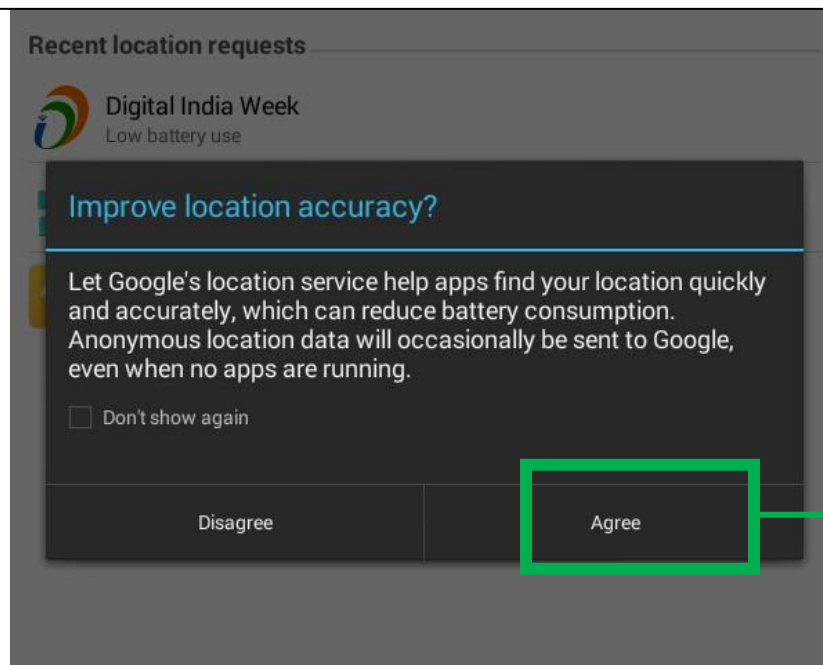

On clicking cancel button, app will not get the latitude and longitude details because of which user will not be able to fill in the details.

Once you click on the settings button, below screen will appear.

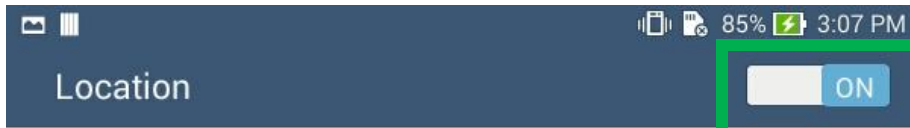

Click to switch ON the GPS settings.

After clicking on the above button, following screen will appear

Click on Agree button to allow device to track your location.

Mode  
High accuracy

Location services

 Google Location History

Recent location requests

 Digital India Week  
Low battery use
